

Research Study: Family Outcomes in Autism Spectrum

Who:

- Parents who have a child (age 5 to 15 years) on the autism spectrum
- Both parents participate

Purpose:

- To learn about family experiences such as parenting joys and challenges and the partner relationship
- To understand connections between parent and child emotions in everyday life

* Participation is confidential

* Disponible en español

Study Description:

- 2 hour session at the Waisman Center or your home to:
 - Fill out measures and
 - complete videotaped activities with your child
- 7-day diary in which you write about your daily activities

* You and your partner will each be paid \$80

* Your child will be paid \$20

Funded by NIMH R01 MH009190-01A1 (PI: Hartley)
